

Austrroads Guide Temporary Traffic Management Edition 1.1

Revision Summary

Edition 1.1 of the **Austrroads Guide Temporary Traffic Management (AGTTM)** updates the inaugural edition released in December 2019.

This edition ensures improved guidance and consistency between the different parts of the AGTTM, and with the Australian Standard AS 1742.3 Traffic Control for Works on Roads. This revision provides practitioners with clarification and information on best practices in temporary traffic management.

Key updates for each part are summarised below:

- **Part 1: Introduction:** Minor updates and inclusion of an additional definition.
- **Part 2: Traffic Management Planning:** Additional information and clarification on when the use of Traffic Controllers is suitable and hierarchy of control to mitigate risks at worksites.
- **Part 3: Static Worksites:** Clarification and correction to some sections including:
 - the use of signs at advance warning and termination areas
 - queued traffic management at worksites
 - methods of reducing speed limit at worksites
 - taper lengths
 - information on the use and placement of VMS.
- **Part 4: Mobile Works:** Clarification regarding:
 - sight distance
 - works convoy
 - information on when working near signalised intersections
 - freeway on-ramp/off-ramp.
- **Part 5: Short Term Low Impact Worksites:** Corrections and clarifications in various areas on when short term low impact worksite is appropriate.
- **Part 6: Field Staff:** Additional information on the condition of devices, worksites monitoring, and risk management.
- **Part 7: Traffic Controllers:** Additional information supporting and promoting the use of Portable Traffic Control Devices where suitable.
- **Part 8: Processes and Procedures:** No change, edition 1.0 is current.
- **Part 9: Sample Layouts:** Updates to several example layouts.
- **Part 10: Supporting Guidance:** Minor updates and clarification in some areas.
